

 **FOR IMMEDIATE RELEASE****Keltech Safety Shower Solutions: As Easy as 1-2-3**

Delton, MI, March 25, 2008 – [Keltech Incorporated, a leading manufacturer of safety shower heaters and systems](#) makes it as easy as 1-2-3 to determine your optimal safety shower solution. When workers are at risk from chemical injury, you need an ANSI compliant safety shower or emergency eyewash station. What type of system should you specify to protect workers, meet ANSI standards, and still provide an efficient solution? The answer may be as easy as 1-2-3. Dieter Lutz, Keltech's marketing director explains the logic behind the 1-2-3 solution. "This simplified approach is reinforced by our experience. Engineers and plant managers generally fall into one of these three categories. By classifying which scenario reflects their need, we can provide the most effective solution."

**Which of these scenarios best describes your situation?**

- I already have a shower kit. I just need to heat the water.
  - I need a turnkey safety shower solution.
  - I need to provide safety shower access to multiple or remote locations.
1. [You have a shower kit but need an efficient method to heat water.](#)  
Keltech tankless shower heaters can be paired with any high quality commercial safety shower apparatus and can be mounted near existing shower or eyewash facilities.
  2. [A simple, turnkey solution is required.](#)  
Keltech provides safety shower solutions pairing its tankless water heater with a high quality commercial shower kit. Installation is easy. Install the heater, install the shower and plumb together. Connect the water. Connect the power. You're ANSI compliant and ready for duty.
  3. [Safety shower access is required to service a remote part of the facility or grounds.](#)  
Keltech's portable skid-based emergency safety shower station is the perfect solution where workers are at risk to chemical injury at remote locations. The complete ANSI compliant skid-based heater with shower kit solution is forklift transportable. Just add water and power. It's also an effective solution for supplying ANSI compliant tepid water to multiple remote locations.

**Advantages of Keltech's Tankless Safety Shower Heaters:**

- Provides ANSI compliant tepid water on-demand  
Water is quickly heated to ANSI standards in less than the required 20 to 30 seconds.
- Energy efficient  
Water is heated only when needed. That saves money, energy and water.
- Easy to install – just add water and power  
All you need is access to one electrical connection and a cold water line.
- Built to last  
Keltech safety shower heaters feature quality control systems and premium materials.
